40+ YEARS

COMPANY

A ship-owner in the making, built on real sea time.

Established in January 2015, Alamiyah Marine delivers vessel chartering, management and ship-operator services to private, corporate and government clients — progressing toward becoming a ship-owner specialising in shore and offshore fuel supply. We are supported by marine engineers, naval architects and naval officers with over 40 years in the maritime and offshore industries.

SERVICES

Four lines of marine and offshore work.

01 Ship-to-Ship Bunkering

High-seas and in-port STS fuel transfers — to vessels drifting or under way, and between vessels and offshore platforms across Malaysian waters. Supported by oil storage, barging and road tanker.

02 Vessel Chartering & Management

Chartering, vessel management and marine operations across OSVs, tankers and specialised assets — backed by local and international ship-owner relationships.

03 Marine Transportation & Barging

Marine logistics, barging operations, road tanker and oil storage — moving cargo and fuel safely for the oil & gas and marine sectors.

04 Offshore Support

DP2 vessel support for surveys, crew change, anchor handling, cargo delivery and equipment transfer for upstream and offshore operations.
